

Accredited Activity Standards for the Maintenance of Certification (MOC) Program Simulation-based activities (Section 3)

January 2018 (v.3)

In order for an activity to be accredited in the Royal College Maintenance of Certification (MOC) Program, it must be developed or co-developed with a physician organization, planned to meet the following accreditation activity standards, and reviewed by a [Royal College accredited CPD provider](#).

Part A: Administrative Standards

Administrative Standard 1: All accredited simulation-based activities must be developed or co-developed by a physician organization as defined by the Royal College.

A **physician organization** is a not-for-profit group of health professionals with a formal governance structure, accountable to and serving, among others, its specialist physician members through continuing professional development, provision of health care and/or research.

This definition includes (but is not limited to) the following groups:

- Faculties of medicine
- Hospital departments or divisions
- Medical societies
- Medical associations
- Medical academies
- Physician research organizations
- Health authorities not linked to government agencies
- Canadian provincial medical regulatory authorities (MRAs)

The physician organization(s) developing or co-developing a CPD activity is responsible to ensure that all accreditation standards are met and to submit the application to an accredited CPD provider.

Note: Accredited CPD providers are permitted to self-approve CPD activities they have developed or-co-developed.

Types of organizations that **are not** considered physician organizations:

- Pharmaceutical companies or their advisory groups
- Medical/surgical supply companies
- Disease-oriented patient advocacy organizations (e.g. Canadian Diabetes Association)
- Government departments or agencies (e.g. Health Canada, Public Health Agency of Canada)
- Industry (e.g. pharmaceutical companies, medical device companies, etc.)
- Medical education or communications (MEC) companies (e.g. CME Inc.)
- 'For-profit' on-line educators, publishing companies or simulation companies (e.g. Medscape, CAE)
- Small number of physicians working together to develop educational programming
- Any other for-profit organizations/ventures

All activities must be developed by a planning committee that is representative of the target audience.

See Part C - Ethical Standards for additional requirements for the planning committee

Administrative Standard 2: All accredited simulation-based activities must have a scientific planning committee (SPC) that is representative of the target audience.

All CPD activities must be developed by a scientific planning committee (SPC) that is representative of the target audience. The target audience is defined as the specific group of physicians, specialist or other healthcare professionals for whom the CPD activity will be aimed. Therefore, the target audience must be determined from the inception of the CPD activity so that the SPC can be chosen accordingly.

There is no minimum or maximum number of members required to sit on the SPC. Best practice would suggest that if the CPD activity is aimed at only one specialty, representatives with other demographic factors should be included on the SPC to allow for more comprehensive representation from within a singular target audience.

The SPC is ultimately responsible for the following program elements:

- Identification of the educational needs of the target audience
- Development of educational objectives
- Selection of educational methods
- Selection of all individuals (planning committee members, faculty) or organizations in a position to control the development of content
- Development and delivery of content
- Evaluation of outcomes

Administrative Standard 3: All accredited simulation-based activities must maintain attendance records and provide participants with a certificate of participation that includes the appropriate accreditation statement(s).

A certificate of participation or written confirmation signed by the chair of the planning committee must be issued to participants for all accredited learning activities.

The certificate must specify the following elements:

- The title of the activity.
- The name of the physician organization (and co-developer if applicable) responsible for the activity.
- The date(s) the activity took place.
- The location of the activity (i.e. city, country, web-based).
- The total number of hours the activity is accredited for.
- The number of hours the registrant attended the activity (or a blank space for the registrant to complete themselves).
- All applicable accreditation statements (include co-development statement when necessary).

The physician organization is responsible for maintaining attendance records for a 5 year period.

Part B: Educational Standards

Educational Standard 1: Simulation-based activities must be planned to address the identified needs of the target audience within a specific subject area, topic or problem. This information will assist in identifying learning objectives, selecting appropriate educational content and format, and developing evaluation and assessment strategies.

Simulation-based activities must be based on an assessment of need including but not limited to changes to the scientific evidence base, established variation in the management or application of knowledge or skills by physicians or teams, variation in the quality of care or health care outcomes experienced by patients.

The needs should be determined by considering the identified needs of the target audience or other health professionals. The needs assessments can identify either perceived or unperceived needs and should be used to inform:

- the development of learning objectives
- the identification of appropriate educational or delivery methods
- the selection of relevant educational content
- the development of evaluation strategies.

Educational Standard 2: Learning objectives that address the identified needs of the target audience must be created for the simulation-based activity. Learning objectives must be printed on the program, brochure and/or handout materials.

The identified learning needs of the target audience must be utilized in the creation/development of the learning objectives.

The identified learning needs of the target audience must be utilized in the creation/development of the learning objectives.

Learning objectives must clearly describe the intent of the educational activity, be written from the perspective of the learner, and express the expected outcomes determined by the Scientific Planning Committee and faculty.

Learning objectives must be made available to participants prior to the activity and must be incorporated into the evaluation strategy (*See Educational Standard 5*). The planning committee must ensure that the selected educational methods and delivery are consistent with the identified need(s) and stated learning objectives as well.

Educational Standard 3: Simulation-based activities must describe the methods that enable participants to demonstrate or apply their knowledge, skills, clinical judgment and/or attitudes.

Simulation-based activities must provide participants with a strategy to assess their knowledge, skills, clinical judgment and/or attitudes in comparison to established evidence (scientific or tacit).

All simulation-based activities must enable participants to demonstrate and assess their abilities/competencies across the key areas of the scenario(s), topic(s) or problem(s). Participants must complete all required activities or components of the activity.

Educational Standard 4: The simulation-based activity must provide detailed feedback to participants on their performance to enable the identification of any area(s) requiring improvement through the development of a future learning plan.

Providing specific feedback on the performance of the individual or team in achieving the learning objectives and demonstrating the competencies embedded within the simulation scenario(s) enables participants to identify areas for improvement and the creation of a future learning plan.

Feedback must be provided based on an assessment of performance as measured against the learning objectives, competencies, and practice standards supported by published evidence. The feedback provided for participants can be completed at the end of the scenario or at a later time. The provision of tools to structure the reflection on performance and time for personal reflection is encouraged.

For online simulation-based activities:

1. There must be an established process for how participants will provide responses to online scenarios. E.g., online response sheet or other web-based assessment tools.
2. Participants must be able to receive feedback after the completion of the scenario. Feedback must include references justifying the appropriate answer.

For live simulation-based activities:

1. There must be an established process for how participants will receive feedback on their performance. E.g., verbally, through the evaluation sheet, etc.
2. Participants must be able to receive feedback after the completion of the scenario. Feedback must include references justifying the appropriate answer.

Educational Standard 5: The simulation-based activity must provide participants with an opportunity to evaluate the overall program and each individual module (if applicable).

Accredited simulation-based activities must provide participants with an opportunity to evaluate each individual module(s), if applicable, and the overall CPD activity. The evaluation system must:

- Allow participants to identify whether the individual session and overall CPD activity learning objectives were met;
- Ask participants to identify whether the content was balanced and free of commercial or other inappropriate bias;
- Provide opportunities for participants to identify the potential impact of the CPD activity for their practice.
 - relevance of the simulation to the participant's practice
 - the appropriateness or relevance of the scenario
 - ability to identify CanMEDS professional competencies
 - program design i.e. sufficient instruction time, sufficient practice time
 - each participant is provided with individual feedback on their performance
 - whether instructors evaluate competencies, skills and/or attitudes

The evaluation form should include an open text box where learners may offer further details if content was not balanced, free of commercial or other inappropriate bias.

Part C: Ethical standards

Note: All activities accredited after January 1, 2018 must comply with the [National Standard](#) for support of accredited CPD activities. The Standard applies to all situations where financial and in-kind support is accepted to contribute to the development, delivery and/or evaluation of accredited CPD activities.

* * *

Element 1: Independence

This section describes the membership, roles, responsibilities and decision authority of a scientific planning committee.

- 1.1 Every accredited CPD activity must have an SPC that includes representatives of the intended target audience. The SPC is the group responsible for all decisions noted throughout the Standard.
- 1.2 The SPC may consider data or advice from all sources, but must ensure that decision-making related to the following CPD program elements is under its exclusive control:
 - a) Identification of the educational needs of the intended target audience;
 - b) Development of learning objectives;
 - c) Selection of educational methods;
 - d) Selection of speakers, moderators, facilitators and authors;
 - e) Development and delivery of content; and
 - f) Evaluation of outcomes.
- 1.3 Representatives of a sponsor or any organization hired by a sponsor cannot participate in decisions related to CPD program elements a) through f) within 1.2.

Element 2: Content Development

This section describes the processes and requirements for members of the SPC and speakers to develop content that is responsive to the needs of the intended target audience.

- 2.1 The SPC must have mechanisms in place to support the development of content and/or materials that address the identified educational needs of the intended target audience. Specific interests of any sponsor must have no direct or indirect influence on the content and/or materials of an accredited CPD activity.
- 2.2 A process must be in place to ensure that those responsible for developing or delivering content are informed about:
 - the identified needs of the target audience,
 - the need to ensure that the content and/or materials presented provide (where applicable) a balanced view across all relevant options related to the content area,
 - the intended learning objectives for the activity,

- ensuring that the description of therapeutic options utilize generic names (or both generic and trade names) and not reflect exclusivity and branding.
- 2.3 The SPC must have a process to collect from participants their assessment of the degree to which the accredited CPD activity:
- met the stated learning objectives,
 - achieved appropriate balance,
 - was perceived to be biased.
- 2.4 The SPC must have a process in place to deal with instances where CPD activities are not in compliance with the Standard.

Element 3: Conflict of interest

This section describes the processes and requirements for gathering, managing and disclosing conflicts of interest to participants.

- 3.1 All members of the scientific planning committee (SPC), speakers, moderators, facilitators and authors must provide to the SPC a written description of all relationships with for-profit and not-for-profit organizations over the previous 2 years including (but not necessarily limited to):
- a) Any direct financial payments including receipt of honoraria;
 - b) Membership on advisory boards or speakers' bureaus;
 - c) Funded grants or clinical trials;
 - d) Patents on a drug, product or device; and
 - e) All other investments or relationships that could be seen by a reasonable, well-informed participant as having the potential to influence the content of the educational activity.
- 3.2 The SPC is responsible to review all disclosed financial relationships of speakers, moderators, facilitators and authors in advance of the CPD activity to determine whether action is required to manage potential or real conflicts of interest. The SPC must also have procedures in place to be followed if a conflict of interest comes to its attention prior to or during the CPD activity.
- 3.3 All members of the SPC, speakers, moderators, facilitators, and authors, must disclose to participants their relationships as described in 3.1
- 3.4 Any individual who fails to disclose their relationships as described in 3.1 and 3.3 cannot participate as a member of the SPC, speaker, moderator, facilitator or author of an accredited CPD activity.

Element 4: Receiving Financial and in-kind Support

This section provides a description of the requirements for the scientific planning committee (SPC) in receiving and distributing financial and in-kind support.

- 4.1 The SPC is responsible to receive any financial and in-kind support for the development of an accredited CPD activity.
- 4.2 The SPC cannot be required to accept advice from a sponsor as a condition of receiving financial and in-kind support. Specific interests of any sponsor must have no direct or indirect influence on any aspect of the development, delivery or evaluation of an accredited CPD activity.
- 4.3 The terms, conditions and purposes by which sponsorship is provided must be documented in a written agreement signed by the SPC and the sponsor.
- 4.4 The SPC can assume or delegate to a third party the payment of travel, lodging, legitimate out of pocket expenses and any honoraria offered to members of the SPC, speakers, moderators, facilitators and/or authors. The SPC must approve what payments are delegated and retain overall accountability for these payments.
- 4.5 Participants (who are not members of the SPC, speakers, moderators, facilitators and/or authors) cannot accept payment or subsidies for their travel, lodging or other out of pocket expenses to participate in an accredited CPD activity. This provision does not preclude participants' claiming and receiving compensation from residency programs, employers or provincial CPD support funds, even when activities they attend have received support from these sources.
- 4.6 The travel, lodging or other out of pocket expenses of spouses, partners or other family members of: the SPC, speakers, moderators, facilitators, authors or participants cannot be paid for or subsidized by the CPD provider organization, sponsor or any organization hired by a sponsor.
- 4.7 Social activities associated with CPD activities cannot occur at a time or location that interferes/competes with or takes precedence over accredited CPD activities.
- 4.8 Upon request, the SPC must disclose how the financial and in-kind support was used for the accredited CPD activity.
- 4.9 The SPC has an obligation to ensure that their interactions with sponsors meet professional and legal standards including the protection of privacy, confidentiality, copyright and contractual law regulations.

Element 5: Recognizing Financial and in-kind Support

This section provides a description of the requirements for the SPC in recognizing financial and in-kind support received from sponsors.

- 5.1 The SPC must recognize and disclose to participants all financial and in-kind support received from sponsors of CPD activities as part of a sponsorship acknowledgement page separate from the educational content.
- 5.2 Beyond the standard acknowledgement statement of financial and in-kind support outlined in 5.1, the linking or alignment of a sponsor's name (or other branding strategies) to a specific educational session or section of an educational program within an accredited CPD learning activity is prohibited.

Element 6: Managing Commercial Promotion

This section defines the requirements related to exhibits and the types of materials that can and cannot be displayed.

- 6.1 Product-specific advertising, promotional materials or branding strategies cannot be included on, appear within, or be adjacent to:
 - any educational materials, slides, abstracts and handouts used as part of an accredited CPD activity;
 - activity agendas, programs or calendars of events (preliminary and final);
 - any webpages or electronic media containing educational material.
- 6.2 Product-specific advertising, promotional materials or branding strategies cannot be included on/appear within locations where accredited CPD sessions are occurring (e.g. lecture halls, small group discussion rooms) immediately before, during or immediately after an accredited CPD activity.
- 6.3 Commercial exhibits or advertisements must be arranged in a location that is clearly and completely separated from the accredited CPD activity.
- 6.4 The SPC cannot be required by an exhibitor or advertiser to accept advice concerning the CPD activity development, delivery or evaluation as a condition of their exhibit or advertisement. Specific interests of any exhibitor or advertiser must have no direct or indirect influence on any aspect of the CPD activity development, delivery or evaluation.
- 6.5 Any incentive provided to participants associated with an accredited CPD activity must be approved by the SPC.

Element 7: Unaccredited CPD Activities

This section defines the roles and responsibilities of the SPC in relation to unaccredited CPD activities.

- 7.1 The SPC cannot schedule unaccredited CPD activities to take place at times and locations that interfere or compete with accredited CPD activities.
- 7.2 Unaccredited CPD activities cannot be listed or included within activity agendas, programs or calendars of events (preliminary and final).

Additional Resources

ACCREDITATION PROCESS

1. Review the CPD accreditation standards.
2. Contact a Royal College accredited CPD provider to obtain the appropriate forms, policies and procedures or applicable fees for having the program reviewed and accredited (*See Directory of Accredited CPD Providers below under Useful Web Links*).
3. Once the activity is accredited, certificates of participation and activity promotional materials can be updated to include the applicable accreditation statement.
